CAMPAIGN!!!

*Protest Day  
18:th April*

*We tenants can not afford!*

Raising rents is already very heavy for tenants who are hit hard by the pandemic. Now we are even more threatened by worse rent shock that is a result of the government parties, Centers and the Liberals directive for an inquiry about free **renting in the new construction without negotiation**, and a rental commission with a view to even higher rents for apartments in better locations, and with a good standard. When, in addition, nothing is done about the property owners already today being able to shock the rents after renovations, we are threatened by completely unreasonable market rents.

**Read more about renovations in Sala Allehanda!**

*We can not afford new rent shock!*

The coronavirus has taught us that cramped housing accommodations are a health hazard. When we have to spend more and more of our money on rent, we are forced to opt-out of dental visits, children's leisure activities, or pizzeria visits. Many will not be able to stay. For more homes will not be built. The only thing market rents lead to is systematically increasing class gaps and housing segregation.

*Joined in the campaign against market rents!*

**Market rents would mean raised rents in etament in 50% in Stockholm and Gotenburg and 25-35% in Sala.**

The moderates have campaigned for market rent for all rental apartments. Now a protest movement is growing all over the country. If we become sufficiently numerous, the new threats to market rents can be stopped and replaced by new demands for a socially just housing policy that provides housing for all and a more resilient society. It is necessary that even Sala's politicians support this!
